

Give Your Workers the Power of One

Customers today are more connected than ever – which means they expect your business to be too. The reality is, however, that most teams struggle to keep up due to multiple workers on the go using a multitude of devices and networks to communicate. These constant disconnects contribute to delays, inefficiencies and ultimately losses to your business.

Why not streamline your workflows? By adding Workforce Connect your team can communicate and act together as a unified front – taking customer service to the next level.

One Communications Wavelength

Easily marry all of your voice and data communications onto a singular device using software that allows your team to do more on the go:

Instantly reach employees

Handle voice telephone calls

Access information in your line-of-business applications

Manage teams remotely with robust push-to-talk and text messaging

Communication Without Complication

Replace deskphone dependency and device struggles with worker freedom. With Workforce Connect's Profile Manager, workers can grab any device in the pool and load up the same role-based experience every time. Dynamically control access and empower associates by connecting them to specific contacts, applications, and device features remotely at the touch of a button. Plus, your IT team can easily deploy, locate and manage your entire device fleet from anywhere.

Workforce Connect Offers:

Voice Client:

Eliminate employee desk phone dependency. Easily communicate one-to-one or Ad Hoc Conferencing for 3-way conversations on the go by setting up specific workgroups and controlling access rights based on each individual need. Take it further by connecting business apps with voice apps to create one seamless workflow.

If needed, you could add Voice Enablement Signature Service as an option that unites voice capabilities with mobility technologies to expand connectivity and reduce devices across your customer's enterprise.

Devices supported: Zebra mobile computers.

Works over: Wi-Fi.

Integrate: | Zebra Staff Communication Apps | Bring Your Own Device (BYOD) model

Speed up Team Response

Improve Workflow

Increase Mobile Flexibility

Push-to-Talk (PTT) Pro:

Enable smarter decisions and higher efficiency by integrating secure push-to-talk voice and messaging on every mobile device, allowing communication with a single person or in groups. With PTT Pro, sending a single message to the field or taking over a conversation is easier than ever.

Additionally, knowing where everybody is at all times is guaranteed with presence and outdoor location services that track users, devices, and history.

Devices supported: Zebra mobile computers, BYOD (bring your own device) Android and iOS, and Windows desktop computers.

Works over: Wi-Fi and Cellular.

Communicate: | Worker-to-worker | Worker-to-group | Specific Workers in a Group

Eliminate Boundaries

Deliver Messages Consistently & Securely

Connect with Teams Anywhere
